

**Job category:** Internship

**Job Title:** Software Developer Intern

**Job location:** Switzerland. The position will be associated to a co-working space located in Ticino.

**Contract:** 12 months internship full time or part time (min 50%). Interns will be evaluated for permanent positions during the internship.

**Start date:** 1<sup>st</sup> January 2018.

### **Internship description and responsibilities:**

*Are you interested in new challenges and in the opportunity to explore new technology?*

*Don't miss the chance to experience an internship within Martel Lab! We will make you work with Docker, Kubernetes, Elastic Search and other cutting edge technologies.*

### **What will you need to make it?**

Education and Experience:

- An ongoing (or recently concluded) bachelor/master's degree in computer science or a related discipline.

Technical Skills:

- Object-Oriented programming (python).
- Software management tools (e.g. GitHub).

Organisational Skills:

- Creativity and open-mind 😊
- Proactive attitude.
- Excellent English.
- Ability to travel.

### **What could be a plus?**

- Knowledge of Docker.
- Understanding of Agile principles

### **About Martel:**

Martel is a dynamic Swiss-based consultancy with more than 20 years' experience managing innovation projects across Europe and worldwide. After more than one hundred projects, Martel has grown from its origins as a small business with just three employees into a thriving agency with 16 employees located in offices in Zurich, Lugano, Bern and Lausanne.

Building on its foundation in EC project management consulting, Martel's business has diversified to include EC funding, R&D and innovation research, training, marketing and media. With a skilled and passionate team, we are here to help you achieve your innovation goals for today, and the future.
